

# Privacy Policy and Data Safety

We work hard to win and maintain your trust, so your privacy and data safety are key priorities for us.

## Information Collection

You have to register with your credentials to use the *DPWorks* app. No other information will be gathered by the app without your consent.

1. Information you provide us during your registration (name, email id, address, contact number):
  - a. Email id and phone number are required to verify a registered user. Both the credentials are essential for app functionality to identify a valid unique user.
  - b. As per the app functionality, a user can only update the data of people who are known to him/her near his/her address only. Therefore, a proper address with PIN code is required during the registration.

## Information Sharing

Information collected through the app is stored in dedicated cloud servers and data is fully encrypted during transmission between client app and server.

1. We may disclose to third party services certain information as listed below:  
Location information may be shared to third party service providers for services required to validate the address of a user.

## Notification of Changes

When there are substantial changes to the privacy and data safety policy, we will display them on the app store page so that you are aware of any changes in the type of information collected, how it is collected, used, and shared.

# Information regarding Account/Data Removal/Deletion

You can submit an account/data removal/deletion request by clicking the “Submit data deletion Request” link given in the profile section of the app. Prior to that, you will have to specify your registered email id and the reason(s)/issue(s) behind your decision.

We will do our best to respect your privacy and we may contact you for your confirmation upon receiving your request for the same.
